

Core Curriculum for Vascular Nursing

The Core Curriculum for Vascular Nursing is a 27 chapter text designed to meet the needs of today's multi-tasking vascular nurse. Prepared in outline format and generously illustrated, the Core provides information on the full spectrum of vascular conditions, as well as vascular anatomy, diagnostics, medications, surgical interventions, nursing diagnoses and patient education & vascular nursing research. Each chapter includes a case study with study questions, along with extensive current printed and electronic references for those preparing for ANCC certification. This evidence-based text will prove to be an essential addition to your personal, unit & institutional library.
